

Wicker Park Pool & Bath House Demolition

North Township - Highland, Indiana

DVG prepared the plans and specifications for the demolition of the Wicker Park Pool & Bath House, an old WPA project constructed in 1939. DVG created the demolition construction plans, project specification, contract documents and served as the on-site construction manager during the demolition process.

The specifications were developed to require the demolition activity to recycle the demolition material. The Wicker Park Pool & Bath House provided many years of memories for those who enjoyed the long summer days wading in its cooling water.

As a remembrance of the days past, DVG preserved a large quantity of the common brick and presented the bricks with a memento plaque to the North Township Trustee for historical preservation.
