

Winfield Woods Site Development Planning & Design

Vanco Construction Services
Winfield, Indiana

DVG was part of a multi-disciplinary team to develop a 21-acre Medical Office and Health Care Specialty Campus in Winfield, Indiana on 109th Avenue at the entrance to the Lakes of the Four Seasons. Phase 1 of the project included a new 3-story, 40,000 square foot patient care facility.

DVG prepared the detailed site development engineering plans and specifications for the Phase 1 building site including delineating on site wetlands. The site design accounted for protecting woodlands, wetlands and accommodated severe slopes within the site. The project included the development of a landscaped boulevard entrance drive, on site water supply and wastewater management. Phase 1 construction began in the fall of 2007 and construction was complete in the fall of 2008.
